Table of contents

1	INTRODUCTION	18
1.1	Portfolio company overview	18
1.2	Sector and country exposure	19
2	ENVIRONMENTAL AND SOCIAL MANAGEMENT	19
2.1	Progress with implementation of Fund ESMS	20
2.2	Progress with portfolio companies' ESMSs and E&S management	24
2.3	Transactions declined on E&S grounds	25
2.4	Difficulties and constraints – ESMS	25
2.5	Exclusion list	25
2.6	Managing OHS	26
2.7	Climate action	27
2.8	Technical assistance grant funding (TAF) benefits portfolio companies	29
3	PORTFOLIO COMPANIES' ENVIRONMENTAL AND SOCIAL PERFORMANCE	30
3.1	Development impacts – employment	30
3.2	Gender (SDG 5)	31
3.3	Capacity building	32
3.4	Supply chain	33
3.5	Conclusion	33
4	THE TERRASAN GROUP	34
4.1	Group overview – recent information	36
4.2	Saldanha Protein	36
4.3	Aqunion (Pty) Ltd	38
4.4	Summary production, resource use and other relevant data for Terrasan subsidiaries	41
4.5	Environmental category	41
4.6	Status of environmental and social performance to date	44
4.7	Labour and working conditions	53
4.8	Key risks and impacts	56
4.9	Renewal of Terrasan ESAP	66
5	MARGINPAR GROUP	69
5.1	Production	69
5.2	Awards	70
5.3	Environmental category	70
5.4	Status of E&S performance to date	71
5.5	Stakeholder engagement	76
5.6	Positive impacts/corporate social investment	77
5.7	Labour and working conditions	78
5.8	Supply chain	80
5.9	Health and safety	80
5.10	Biodiversity	80
5.11	Summary assessment of E&S risks	82
6	CAPITAL FISHERIES	83
6.1	Environmental category	84
6.2	Status of E&S performance to date	84
6.3	Progress with ESAP	85
6.4	Summary assessment of E&S risks	90
7	JUMBO BRANDS HOLDINGS AND HOUSE OF BISCUITS	92
7.1	Jumbo Brands	92
7.2	House of Biscuits	94
7.3	Environmental category	96
7.4	Status of E&S performance to date	96
7.5	Labour and working conditions	100
7.6	Supply chain	103
7.7	Health and safety	103
7.8	Corporate social investment	105

7.9	Summary assessment of E&S risks	106
8	PEE PEE HOLDINGS TANZANIA LIMITED (PPHL)	107
8.1	Overview	107
8.2	Production process	109
8.3	Expansion projects	111
8.4	Environmental category	112
8.5	Status of E&S performance to date	112
8.6	Resource efficiency	121
8.7	Waste management.....	122
8.8	Labour and working conditions.....	124
8.9	Supply chain	129
8.10	Stakeholder engagement.....	129
8.11	Health and safety.....	131
8.12	Summary of E&S risks.....	134
9	FROSTAN LTD.....	135
9.1	Company description.....	135
9.2	Facilities	136
9.3	Environmental category	139
9.4	Status of E&S performance to date	139
9.5	Summary assessment of E&S risks	152
10	GLACIER PRODUCTS LTD (GPL) – DAIRYLAND.....	156
10.1	Overview of Glacier Products Ltd (GPL)	156
10.2	Expansion project – new ice cream plant.....	158
10.3	Optimisation project.....	159
10.4	Certifications	161
10.5	Environmental category	161

Photograph 9-12. Recent staff events at Frostan.....	147
Photograph 9-13. Professional health and safety training for staff.	148
Photograph 9-14. Staff training events.	148
Photograph 9-15. Frostan purchases all its cattle from local Maasai herders at auction in southern Tanzania, via cattle agents.....	149
Photograph 9-16. First aid training done by OSHA.	149
Photograph 9-17. A worker with full PPE for working in cold conditions.	150
Photograph 9-18. Female staff from Nyam Nyam shops visiting orphanages.	152
Photograph 9-19. A selection of Frostan’s CSI projects.....	152
Photograph 10-1. An overview of Glacier facilities in Nairobi.....	156
Photograph 10-2. GPL has an extensive product portfolio, with the main focus on ice creams and chocolates. At present, it produces more than 6 million litres of ice cream per year, and about 890 tonnes of chocolate. GPL is constantly researching and developing new product opportunities.....	158
Photograph 10-3. Mapping the current state of systems and improvements required.	160
Photograph 10-4. Management and staff participation in identifying and eliminating inefficiencies.	160
Photograph 10-5. Staff receive certificates after food safety training.....	161
Photograph 10-6. Community support and stakeholder engagement.....	167
Photograph 10-7. Glacier brand representatives.	167
Photograph 10-8. Human resources training for Nakuru employees.....	167
Photograph 10-9. Rewards and recognition for staff.	168
Photograph 10-10. Unsafe work areas are cordoned off.	169
Photograph 10-11. Emergency response plan training and exercises.....	169
Photograph 10-12. Safety training and annual medical check-ups.....	170
Photograph 10-13. Practical health and safety training.....	170
Photograph 11-1. Staff working in the WW warehouse.....	172
Photograph 11-2. A range of products being manufactured under the WW brand name.....	173
Photograph 11-3. Waste management in place at all WW warehouses and shops according to their integrated waste management plan.	177
Photograph 11-4. In 2023’s Reforest Fest, WW staff joined the Greenpop team in planting 5 064 indigenous trees at Bodhi Khaya Nature Reserve in Stanford.	178
Photograph 11-5. Some resource efficiency measures that have been adopted in the past year.....	179
Photograph 11-6. Examples of staff training at WW and THH.....	180
Photograph 11-7. Examples of health and safety measures in place at WW and THH.....	184
Photograph 11-8. Some examples of CSI at Maia companies.....	185

Photograph 12-1. The Saanen, a Swiss breed of domestic goat, are heavy milk producers and yields between 3% and 4% fat in the milk, optimal for cheese making.	187
Photograph 12-2. The energy and water-saving initiatives continue to bear fruit at the plant. The tanks are used for harvesting rainwater. The energy saving through the use of solar panels has brought about a substantial annual cost saving.....	191
Photograph 12-3. The waste water dam is fenced, contains warning signs and is not accessible to people other than staff.....	192
Photograph 12-4. A full calendar of staff training is planned every year. In this year for example staff were trained on maintaining a work-life balance (life skills) also certified job training, safe stacking shown here.	193
Photograph 12-5. Training in the ILO Fundamental Labour Conventions.....	193
Photograph 12-6. Effort is made to keep up staff morale through the year; here Spring Day was celebrated in their rugby jerseys before the World Cup rugby game, amongst several other such initiatives.	194
Photograph 12-7. Another view of the Saanen Swiss-breed goat, here a male. The herd of around 1 000 goats is well looked after and healthy.....	195
Photograph 12-8. A safety notice board in the factory.	196
Photograph 12-9. Regular fire drills at Fairview Cheese.	196
Photograph 13-1. APIs and products produced by CPT.	199
Photograph 13-2. Notice boards contain useful information and copies of summaries of labour legislation in accordance with the law.	203
Photograph 13-3. Recently upgraded kitchen and staff canteen.	203
Photograph 13-4. 1 000 L containers (in which fish oil for animal section are delivered) are donated to staff for use as water containers at home, where municipal water supply is often interrupted.....	204
Photograph 13-5. Water purification plant.	205
Photograph 13-6. New de-ionisation plant.	205
Photograph 13-7. Safe storage of hazardous materials.	205
Photograph 13-8. Spill kits located in each plant.	208
Photograph 14-1. The Vital SA production plant in Kuils River, Western Cape.....	216
Photograph 14-2. The Promeal manufacturing plant in Atlantis.....	216
Photograph 14-3. Examples of Vital and Promeal products.....	217
Photograph 14-4. The new ESG officer at Vital and Promeal has been instrumental in improving E&S and OHS signage throughout the plants.	220
Photograph 14-5. Resource efficiency measures at Vital and Promeal.	223
Photograph 14-6. Communicating resource efficiency to staff.....	223
Photograph 14-7. Improvements in packaging.....	224
Photograph 14-8. Old packaging that was not recyclable (left). New packaging with recyclable tin and label (right).....	224
Photograph 14-9. Promeal resource efficiency measures.	225
Photograph 14-10. Pollution prevention at Promeal.....	225
Photograph 14-11. Bunding of a diesel tank at Vital to prevent pollution in the event of a leak (left); neatly sorted waste for collection by waste management company for mainly recycling (right).	226
Photograph 14-12. A poster of the South African Sexual Harassment Act displayed at Promeal.....	227
Photograph 14-13. Life-skills training and social-skills training presented at Vital and Promeal during working hours.....	228
Photograph 14-14. Some of Vital's appointed Spill responders who attended training.	229
Photograph 14-15. Vital trained 2 000 retailers in 2023.	229
Photograph 14-16. Taking in interns and training them. Good candidates are offered contract employment.	229
Photograph 14-17. Wellness initiatives for staff.	230
Photograph 14-18. Awards ceremony held to present staff with their accolades.	231
Photograph 14-19. Posters with the evacuation route have been enlarged and placed in the plant.	232
Photograph 14-20. Health and safety signage.....	232
Photograph 14-21. Both companies distributed food parcels to communities in their area on Mandela Day.	232
Photograph 14-22. Examples of positive impacts by Vital and Promeal.....	233
Photograph 14-23. Brand manager Neil Meyer in conjunction with CLAW (NGO) shot the BOSS (a petfood brand name) adoption drive campaign with local firefighters.	233
Photograph 14-24. Promeal staff take part in the Dogbox Project where their products are available with various freebies for the public.....	234

Photograph 15-1. Aerial view of the Amos Dairies milk processing plant.....	235
Photograph 15-2. The newly appointed, highly qualified and respected CEO, Theodora Marimo.	236
Photograph 15-3. Operations inside the plant.....	237
Photograph 15-4. A selection of Amos Dairies products.....	238
Photograph 15-5. Examples of Amos Dairies milk and permeate powder products.....	238
Photograph 15-6. Food safety operating procedures at Amos Dairies.	239
Photograph 15-7. Milk quality testing stages at Amos Dairies.	240
Photograph 15-8. The food safety policy, quality policy and good manufacturing practices policy are displayed in the workplace, even in the washrooms.....	241
Photograph 15-9. Natural light and ventilation in the plant.....	243
Photograph 15-10. Pollution control measures.	244
Photograph 15-11. The water treatment plant is being temporarily refurbished and has been repainted. ...	245
Photograph 15-12. Staff canteen and meals. A large nutritious meal is served to all staff twice a day (i.e. for both shifts) and likely for some people the only full meal they have per day.	246
Photograph 15-13. The single handwash basin (left) has been supplemented with additional washbasins and also washbasins closer to the plant.....	247
Photograph 15-14. A visit to one of the dairy farmers supplying milk to Amos Dairies.....	248
Photograph 15-15. The due diligence assessor tasting the freshly delivered milk at one of the coops.	248
Photograph 15-16. Smallholder farmers are an important part of the Amos Dairies supply chain.	248
Photograph 15-17. Improvements in OHS aspects at the plant.....	250
Photograph 15-18. Amos Dairies donated milk to local schools on the occasion of World Milk Day 2023. .	251

LIST OF BOXES

Box 2-1. Contents of ESG resources SharePoint site.....	20
Box 2-2. Scope of the carbon footprint assessment.....	28
Box 4-1. Key Terrasan Group policies updated to meet international performance standards and the SDGs.	44
Box 5-1. Policies and plans in place.....	70
Box 5-2. Floriculture Sustainability Initiative (FSI).....	71
Box 6-1. Policies and plans in place.....	85
Box 7-1. Duties of the SEC.....	97
Box 8-1. Key areas and topics of E&S training.	129
Box 9-1. Summary of vehicle incident on 24 October 2023, involving two fatalities and one high consequence case.	150
Box 10-1. Kaizen philosophy.....	159
Box 10-2. Policies and related documents in place.....	161
Box 11-1. WW provides food standards guidelines to their suppliers.	176
Box 13-1. Countering quality concerns.....	198
Box 13-2. Consumer medicine information.	198
Box 13-3. Policies and certifications in place.	200
Box 13-4. APIs Everywhere (extract from IFC Annual Report 2021).	211
Box 13-5. M4ALL’s integrated approach for cost reduction.	211
Box 13-6. CPT contribution to animal health in East Africa.....	212

Abbreviations and acronyms

Abbreviation/acronym	Explanation
ABF	abalone processing factory
AEL	air emission licence
AFMA	Animal Feed Manufacturers' Association
AHSA	Animal Health Strategy for Africa
AIA	Approved Inspection Authority
AIDS	acquired immunodeficiency syndrome
AML	anti-money laundering
APIs	active pharmaceutical ingredients
AWSA	Animal Welfare Strategy for Africa
AVFII	Agri-Vie Fund II
B-BBEE	broad-based black economic empowerment
BESS	battery energy storage systems
BOD	biochemical oxygen demand
BOM	Blue Ocean Mussels
BOPP	biaxially oriented polypropylene
BRC	British Retail Consortium
CAPEX	capital expenditure
CEO	chief executive officer
CFCs	chlorofluorocarbons
CMA	collateral management approach
CoA	certificate of authenticity
COMESA	Common Market for Eastern and Southern Africa
CO ₂	carbon dioxide
CO ₂ e	carbon dioxide equivalent
COVID-19	coronavirus disease [COVID-19 (CORONA VIRUS DISEASE 2019)]
CPP	cast polypropylene
CPT	Chemical Process Technologies
CPTP	CPT Pharma
CRC	Chemical Review Committee
CSI	corporate social investment
CSIR	Council for Scientific and Industrial Research
CSR	corporate social responsibility
CWDP	coastal waters discharge permit
DAFF	Department of Agriculture, Forestry and Fisheries
DD	due diligence
DEA&DP	Department of Environmental Affairs and Development Planning
DFFE	Department of Forestry, Fisheries and the Environment
DOEL	Department of Employment and Labour
E&S	environmental and social
EA	environmental authorisation
EAGA	East African Growth Accelerator
EAP	economically active population
ECD	early childhood development
EDGE	USAID Zambia Enterprise Development and Growth Enhanced (EDGE) Activity
EHPEA	Ethiopian Horticultural Producer Exporters Association
